

PREVENTION OF MARIJUANA AND ILLICIT DRUGS

MADISON
CHATHAM
COALITION

High doses of
marijuana can cause
psychosis or panic
when ingested.

Marijuana resins - budder,
hash oil, wax and shatter -
have 3 to 5 times more THC
than the plant itself. Smoking,
vaping or dabbing can deliver
dangerous amounts of THC to
users.

Marijuana is the most
common illegal drug
involved in auto
fatalities in NJ.
