

# PREVENTION OF YOUTH TOBACCO USE

MADISON  
CHATHAM  
COALITION

**31% of youth who  
vape are likely to  
begin smoking  
traditional cigarettes  
within 6 months.**

**Exposure to nicotine in  
e-cigarettes can affect brain  
growth in youth and young  
adults because the brain is  
not fully developed until  
age 25.**

**One JUUL pod contains  
the same amount of  
nicotine as an entire  
pack of traditional  
cigarettes.**
